

Location

electric wharf

Sandy Lane, Coventry

Creative Coventry

Electric Wharf is at the heart of the continuing rejuvenation of Coventry, building on the success of the Phoenix Initiative in the city centre, the Canal Basin and the developing Swanswell regeneration projects.

The combination of commercial and residential makes Electric Wharf unique in the area. The live/work concept has been successfully proven and the spacious loft apartments with designated work areas and the restored and newly built office suites provide an opportunity to expand businesses at the same time as growing a community.

With easy access to the ring road and the motorway network Electric Wharf is ideally placed for businesses serving clients across the region and, being just a short walk from the city centre, has access to the wide range of bars, restaurants and retail facilities on offer.
